

ADDITIONAL SERVICES BEYOND OUR CORE

Looking 4 Eats provides its clients much more than its core services of website listing and social media post share services. We understand there are many different needs of restaurant owners and managers when it comes to promoting their establishment. These services include:

Webpage Design / Homing

We're finding that around 15 – 20 percent of local restaurants either don't have a website and or they are utilizing their social media / Facebook page as their "Home". Having spent 30 plus years in the advertising world I can say this ... First Impressions go a long, long way! We hate for any client's potential customer response to be ... "They don't even have a website!" Looking 4 Eats Creative Services can provide your restaurant with multiple COST EFFECTIVE website options. First would be a "traditional website" were we get you a domain + server host and then design and upload (most costly). Second option would be a FREE site host such as Wix and we design and provide your restaurant with a link for your social media and for your Looking 4 Eats listing. And the final option would be a dedicated menu / site page on our server ... cheapest option available. Either the way ... it is extremely important that a restaurant have a site.

Promotions / Campaign Development

Looking 4 Eats can work with your restaurant to develop B2B opportunities with other businesses within your community. Help create events that not only promote your establishment but a local cause, club, or school program.

Graphic Services

Looking 4Eats can help design your restaurant's menu, logo, social media promotions, print ads, as well as create one off coupons.

Social Media Management

From setting up your social media presence on Facebook to managing the daily output of notifications of Specials, Coupons, and or Events ... Looking 4 Eats can manage all aspects of your social media.
